

A3.002

We're now organizing HUNTER'S CARDSET using the letters M.A.T.R.I.X. Each letter has four rows—M1, M2, M3, M4—and each row contains seven sub-cards, labeled M1.001, M1.002, M1.003, and so on up to M1.007. This card arrangement is inspired by Niklas Luhmann's note-taking method, and we encourage you to create your own cards in each row. Download the 7 cards from the link below, and let's build them together!

A3.002: Numbered Card System – My Mother
Founded the Best Kindergarten in the World in France
Story Script (Introduction for Parents and Children):

This card will help children learn to organize their ideas using numbers, just like Niklas Luhmann's method of numbering ideas. Kids will draw their ideas for the dream kindergarten, and each card will have a number to help keep track.

Step 1: Drawing and Numbering the Card

Tip:

- Start by drawing another idea for your dream kindergarten. Maybe this time it's the classroom where all the exciting lessons happen. Once your drawing is done, give it a number—like Card 1.002—so you can organize it as part of your collection.

Step 2: Adding a Title and Explanation

- Tip: Add a title to your card, such as "The Magical Classroom," and write a short explanation with your parent's help. For example: "This is where children learn about the world through fun and magic!"

Example Card for Inspiration:

- Title: The Magical Classroom
- Drawing: A bright classroom with colorful walls and happy children learning together.
- Number: 1.002
- Explanation: "This is where children from all over learn and play every day."

Magic Sentence for Kids:

"Today, my magic sentence is: My ideas grow with each new card!"

Reward Mechanism for Motivation:

- Weekly: After creating and numbering one card a day for a week, your child can receive a special Classroom Star sticker.
- Monthly: After completing 30 numbered cards, your child earns the Master Organizer badge.
- 180 Days: At the end of 180 days, your child receives the "Best Kindergarten Creator" Award for their creativity and organization.

Tips for Parents:

- Use any notebook or blank cards to help your child create numbered cards.
- Each card should have a number and a short description, helping your child organize their dream kindergarten step by step.

Conclusion:

By numbering their ideas, children learn how to organize their creativity and watch their dream kindergarten grow with every new card!
