PAPER—WE'LL TAKE \$1 OFF THE CARD'S PRICE.

MATRIX KIDS CARDS MUSEUM

Love you

Dear Friend,

We're going to turn what we learn into questions on a test paper. Like, we'll use numbers 1 through 10 where 1 is a stick, 2 is a duck, and so on, up to 10. We'll put these shapes on the test paper. We can read them in many ways — up, down, or diagonal. There'll be stuff about staying safe and some rules we need to know. Like, numbers go in a special order: 1, 3, 5, 7, 9, and 2, 4, 6, 8, 10. They skip each other! I noticed patterns everywhere, even in the lines and mountains. Some lines are straight or curve like a '2'. Mountains have different shapes because they are different heights. That's part of the rules too.
