

Leading the Way in Information

Just imagine,

You have a driver's license that permits you to travel worldwide, and your vehicle has matrix functions enabling it to produce various products independently and massively with almost zero cost!

With this matrix driver's license, you have the right to travel around the world and sell your independently produced products with little effort.

Not only that, but this car can also self-produce, achieving complete self-production.

At the same time, and more importantly, self-service sales are fully realized. While many factories worldwide have adopted fully automatic production models, only some machines can implement self-service sales models. Due to localized sales, selling to kids (0-6) and their families worldwide becomes an exceptional sales model.

Remember, this is not just a card. This is a right. Isn't this the most fabulous invention in the world?

What we've just mentioned is an idea. You might ask, how is this possible? Yes, it's possible that this can't be done. But it's more likely that it can be done.

LET'S REARRANGE OUR IDEA AGAIN: (4 TYPES OF OBJECTS) 1 (FACTORY) 1 (STORE).
ALL MODELS SERVE INFANTS AND TODDLER FAMILIES AROUND THE WORLD.

FIRST. LET'S TALK ABOUT 4.

For the first type of object, we used HUNTER's thought experiment to demonstrate the fantastic effects of practicing for 5 minutes a day for 180 days. This experiment is the greatest innovation of Matrix Kids Cards. If Hunter can do it, so can you! However, the reality is that as young children and parents, we may feel tired, irritable, or even angry. If our inner drive isn't strong enough, we may struggle to persevere.

Even in just 180 days, this is the matrix model we will provide you with later: the core model of Matrix Kids Cards. If Matrix Kids Cards, as a commercial brand, were a person, our matrix model would be that person's soul. It is the driving force behind everything. Without this driving force, nothing can function. If you lack motivation, we will help you find the source of it. If you lack a method, we provide experimental replication and product methods. If you lack materials, we provide the foundational material. We are like a nurturing presence; Matrix Kids Cards is proud to be your guide, assisting you and your children. Sitting on the sofa in your own home, looking at the lights outside the window on a rainy night, the reflected light and shadows fill my heart with gratitude. That's all, so thank you!

OKAY. LET'S TALK ABOUT THE SECOND TYPE OF OBJECT NEXT.

It is the triangle structure of Matrix Kids Cards.

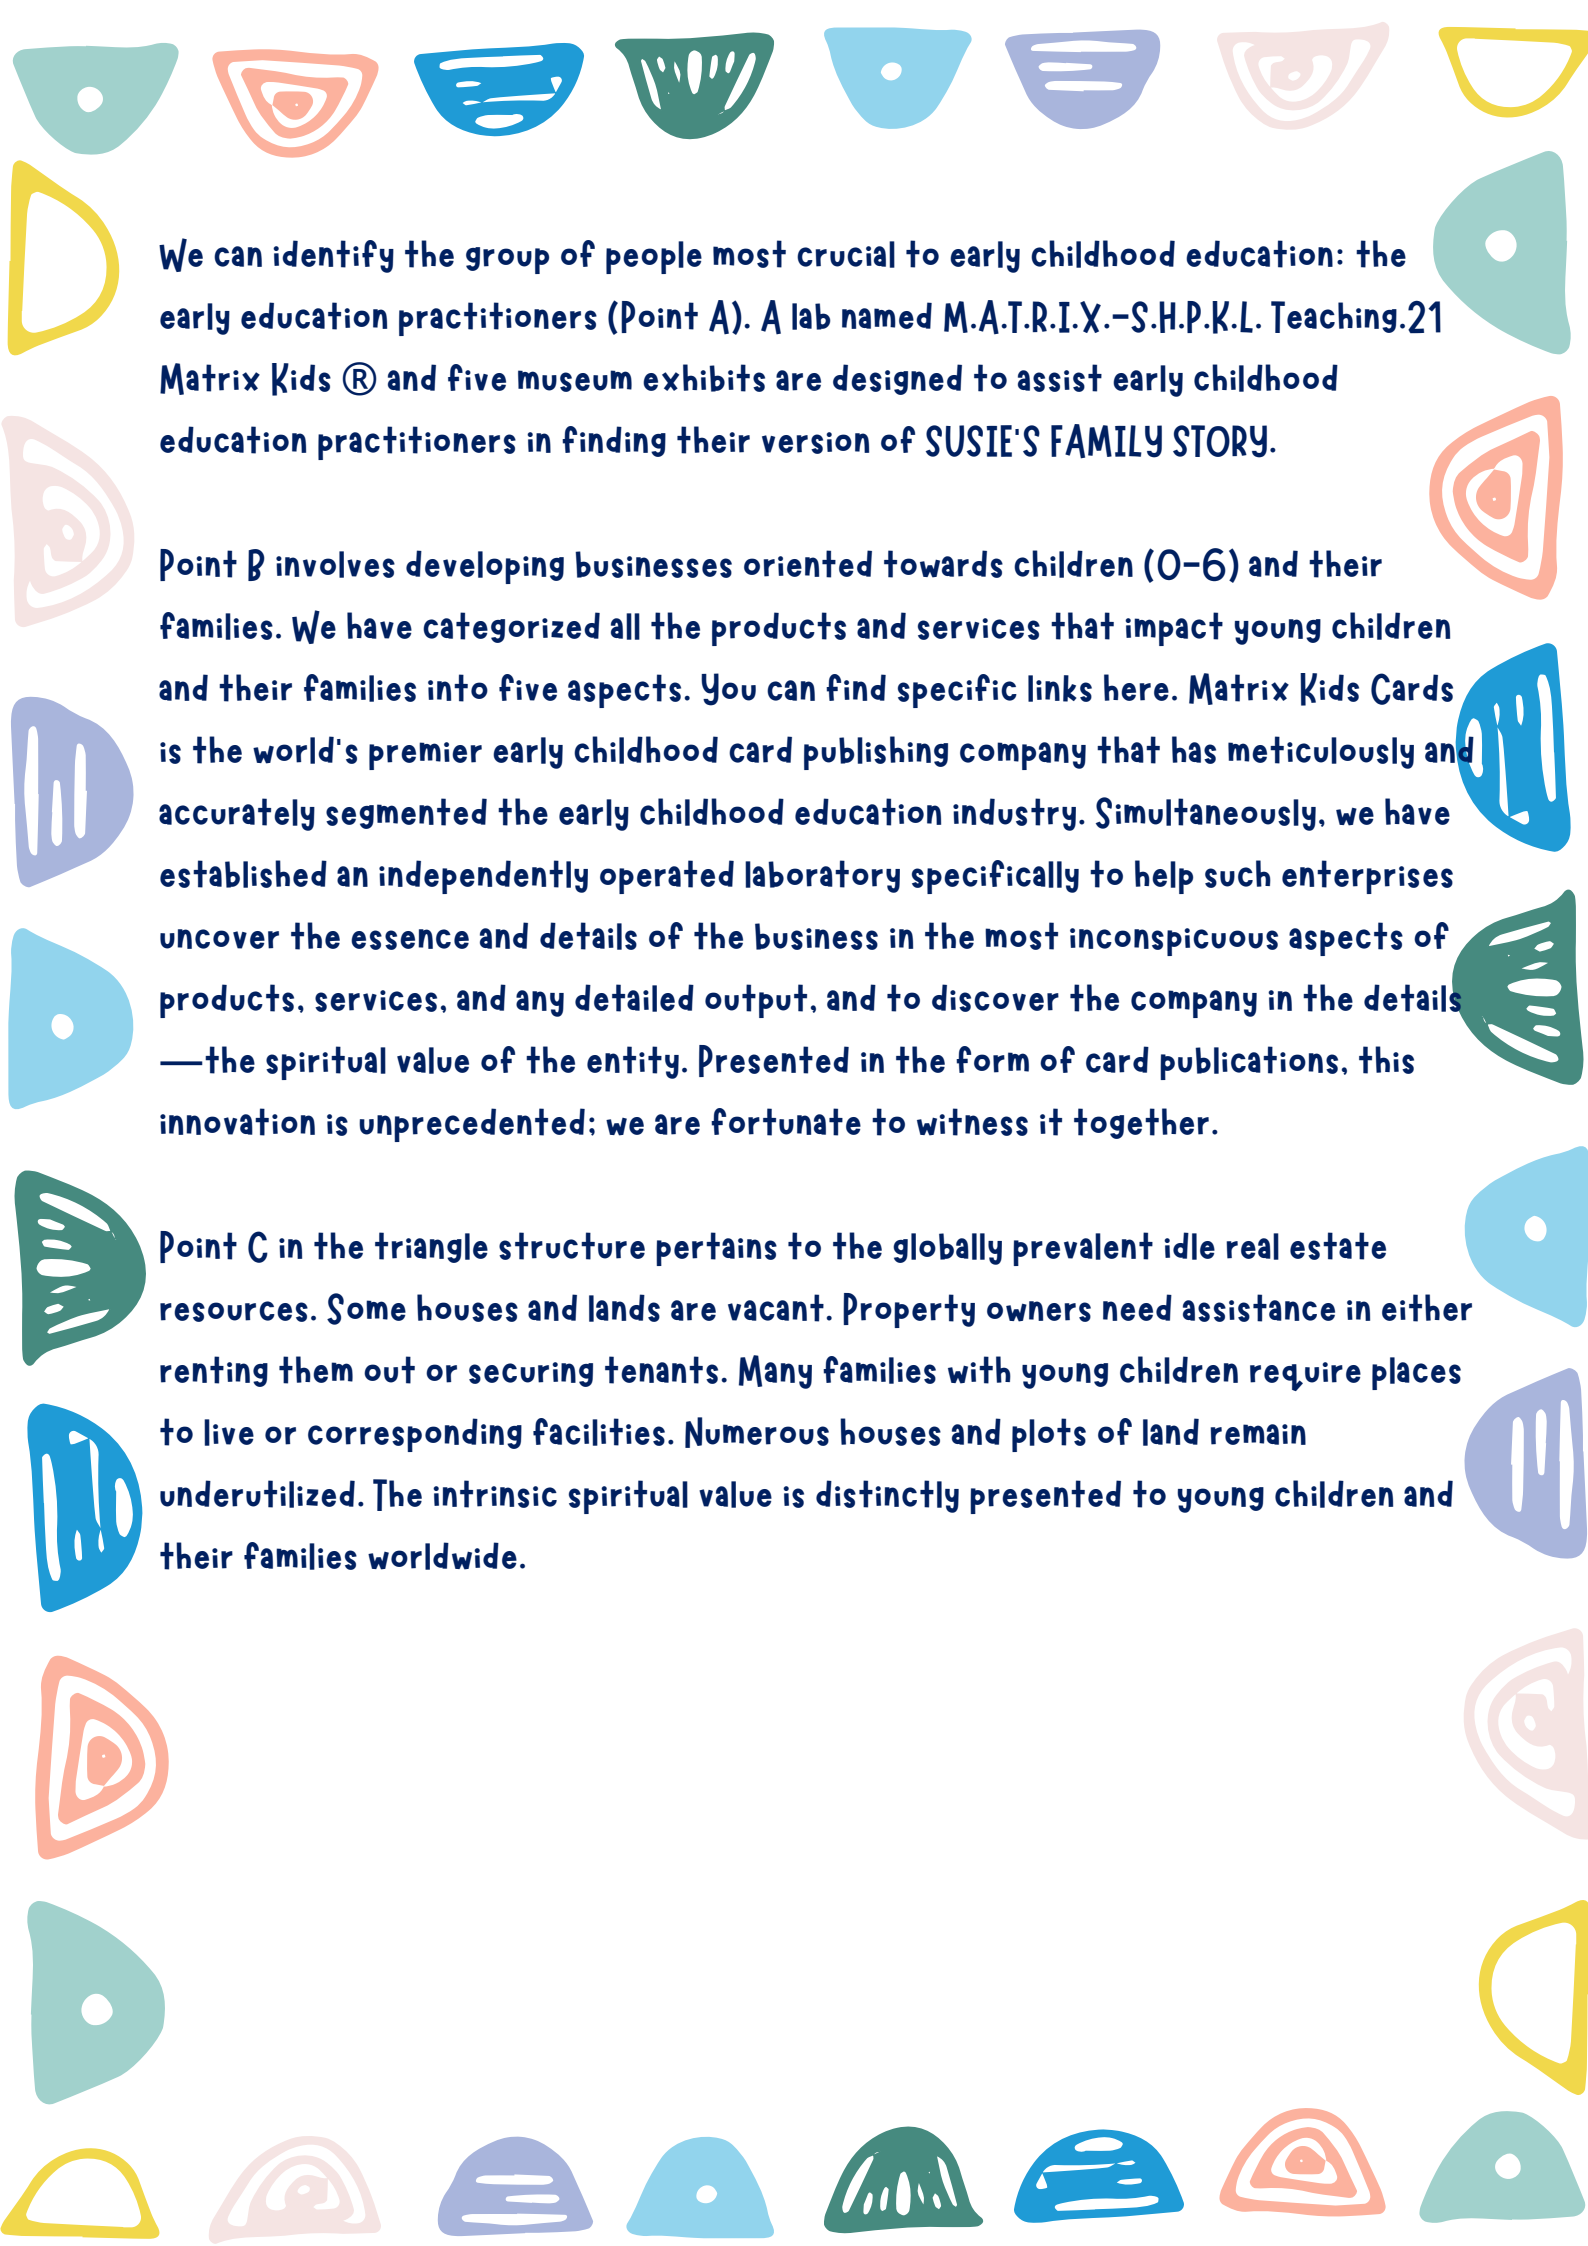

A decorative border of colorful abstract shapes, including circles, triangles, and irregular polygons in shades of teal, orange, blue, green, and yellow, surrounds the text.

We can identify the group of people most crucial to early childhood education: the early education practitioners (Point A). A lab named M.A.T.R.I.X.-S.H.P.K.L. Teaching.21 Matrix Kids ® and five museum exhibits are designed to assist early childhood education practitioners in finding their version of SUSIE'S FAMILY STORY.

Point B involves developing businesses oriented towards children (0-6) and their families. We have categorized all the products and services that impact young children and their families into five aspects. You can find specific links here. Matrix Kids Cards is the world's premier early childhood card publishing company that has meticulously and accurately segmented the early childhood education industry. Simultaneously, we have established an independently operated laboratory specifically to help such enterprises uncover the essence and details of the business in the most inconspicuous aspects of products, services, and any detailed output, and to discover the company in the details—the spiritual value of the entity. Presented in the form of card publications, this innovation is unprecedented; we are fortunate to witness it together.

Point C in the triangle structure pertains to the globally prevalent idle real estate resources. Some houses and lands are vacant. Property owners need assistance in either renting them out or securing tenants. Many families with young children require places to live or corresponding facilities. Numerous houses and plots of land remain underutilized. The intrinsic spiritual value is distinctly presented to young children and their families worldwide.

We can identify the group of people most crucial to early childhood education: the early education practitioners (Point A). A lab named M.A.T.R.I.X.-S.H.P.K.L. Teaching.21 Matrix Kids ® and five museum exhibits are designed to assist early childhood education practitioners in finding their version of SUSIE'S FAMILY STORY.

Point B involves developing businesses oriented towards children (0-6) and their families. We have categorized all the products and services that impact young children and their families into five aspects. You can find specific links here. Matrix Kids Cards is the world's premier early childhood card publishing company that has meticulously and accurately segmented the early childhood education industry. Simultaneously, we have established an independently operated laboratory specifically to help such enterprises uncover the essence and details of the business in the most inconspicuous aspects of products, services, and any detailed output, and to discover the company in the details—the spiritual value of the entity. Presented in the form of card publications, this innovation is unprecedented; we are fortunate to witness it together.

Point C in the triangle structure pertains to the globally prevalent idle real estate resources. Some houses and lands are vacant. Property owners need assistance in either renting them out or securing tenants. Many families with young children require places to live or corresponding facilities. Numerous houses and plots of land remain underutilized. The intrinsic spiritual value is distinctly presented to young children and their families worldwide.

Our fifth set of Matrix Kids Cards Museum exhibits embodies such showcases. Taking the example of aiding a small winery in southern France that requires improved management and faces a challenging external environment, Matrix Kids Cards employs an 8-step process to assemble a unique set of exhibits. Evaluating the spiritual value from the perspective of grape color and taste, the single core highest value of the wine estate, history, planting, crops, and commercial operations, it showcases the finest set exclusively for this wine estate to the global audience and young children's families worldwide, in the form of cards. This helps them forge a new, unprecedented sales path without altering marketing costs.

We are immensely proud of you!

NEXT, WE WILL DISCUSS 1. THIS MOBILE FACTORY.

1

Some people believe that the heart of a factory lies in the speed of machine operation and the consumption speed of raw materials. This is partially correct. The core resource of a factory lies in its people. Technicians and engineers with practical experience can optimally cooperate with theory and practice. In many cases, a business can have a factory.

If the choice of foundry is good enough, all problems can be easily solved. But the problem is that even for OEM factories, how to improve product quality, reduce error rates, reduce defective product rates, and strengthen system control of product processes is often beyond the power of the business itself. This year, when investors have very little money left, there will be no chance to recover once the OEM factory makes a large-scale mistake.

The core technology of Matrix Kids cards lies in having a matrix factory with continuous production. For example, if you want to invent and transform a card game, such as Monopoly, the best way to do it is to identify the different segment points in the process of how to invent Monopoly. Then, use your imagination to apply matrix ideas to each segment, envisioning them individually, and finally combining them with your profound creativity and knowledge.

To this end, we have specially produced a complete set of innovative versions of Monopoly for toddlers and toddler families worldwide. With the legal authorization of Monopoly, we took young children and families around the world on a virtual journey to Athens, Tippecanoe, and Southern France without leaving home. The method we employ is matrix analysis. The vocabulary of just one language in the encyclopedia reaches billions of words and can be combined hundreds of millions of times. With a click of the mouse, everything comes to life.

FINALLY. LET'S DISCUSS ANOTHER MOBILE SHOP.

1

No matter how good the product is, it is useless if no one sees it. Right?

A prevalent and ubiquitous sales method is using the Internet and social media. This is the first time we're highlighting this; Matrix Kids Cards is probably the only children's publishing company worldwide that doesn't use social media. The reason is simple. This is also part of our business positioning. Many excellent social media channels provide exceptional early childhood education resources, videos, lectures, articles, and blogs. Still, the question is, how long can you focus on the content?

Our sales building has no barriers or information blockades, only open and transparent market information and data.

OUR MOBILE SALES BUILDING IS DIVIDED INTO THREE FLOORS.

The first level is mainly about establishing a local market. On the second level, we replicate the local market template. The third layer is the network matrix sales template. The goal of shared sales is achieved through effective information exchange and mutual assistance. For specific links, please refer here.

Dear friends, Matrix Kids cards are the greatest invention in early childhood education since the 21st century! What reasons do you have for not joining us?

Our grand finale is coming! 🎉🎉🎉

This 4x3-matrix structure can quickly be copied by AI, with a bit more research and human resources. But only with a kind heart that wants to help others and the world, which cannot be copied, unique, unparalleled.

But what is the core and essence of our Matrix Kids cards? The core is the **HELP MATRIX TEMPLATE**.

Have you seen the movie "Pay It Forward"? In that beautiful movie, a great little boy named Trevor presents a new theory to change the world. This movie is also the source of ideas for Matrix Kids cards to invent the **HELP MATRIX TEMPLATE**. We can indeed create the matrix **TEMPLATE**. Thank you, dear Trevor. All core product development comes from the intention to help. After Trevor finished drawing the picture, the first thing he did was to find people around him. For example, the first one was the homeless man next to him. That's because Trevor has yet to attend the **TUTORIAL** of our **HELP MATRIX TEMPLATE**.

The objects of help are not only located near the home but have an independent matrix model:

FIRST QUESTION: WHO DO WE HELP?

- M – MOMMY
- R – WHOM TO HELP

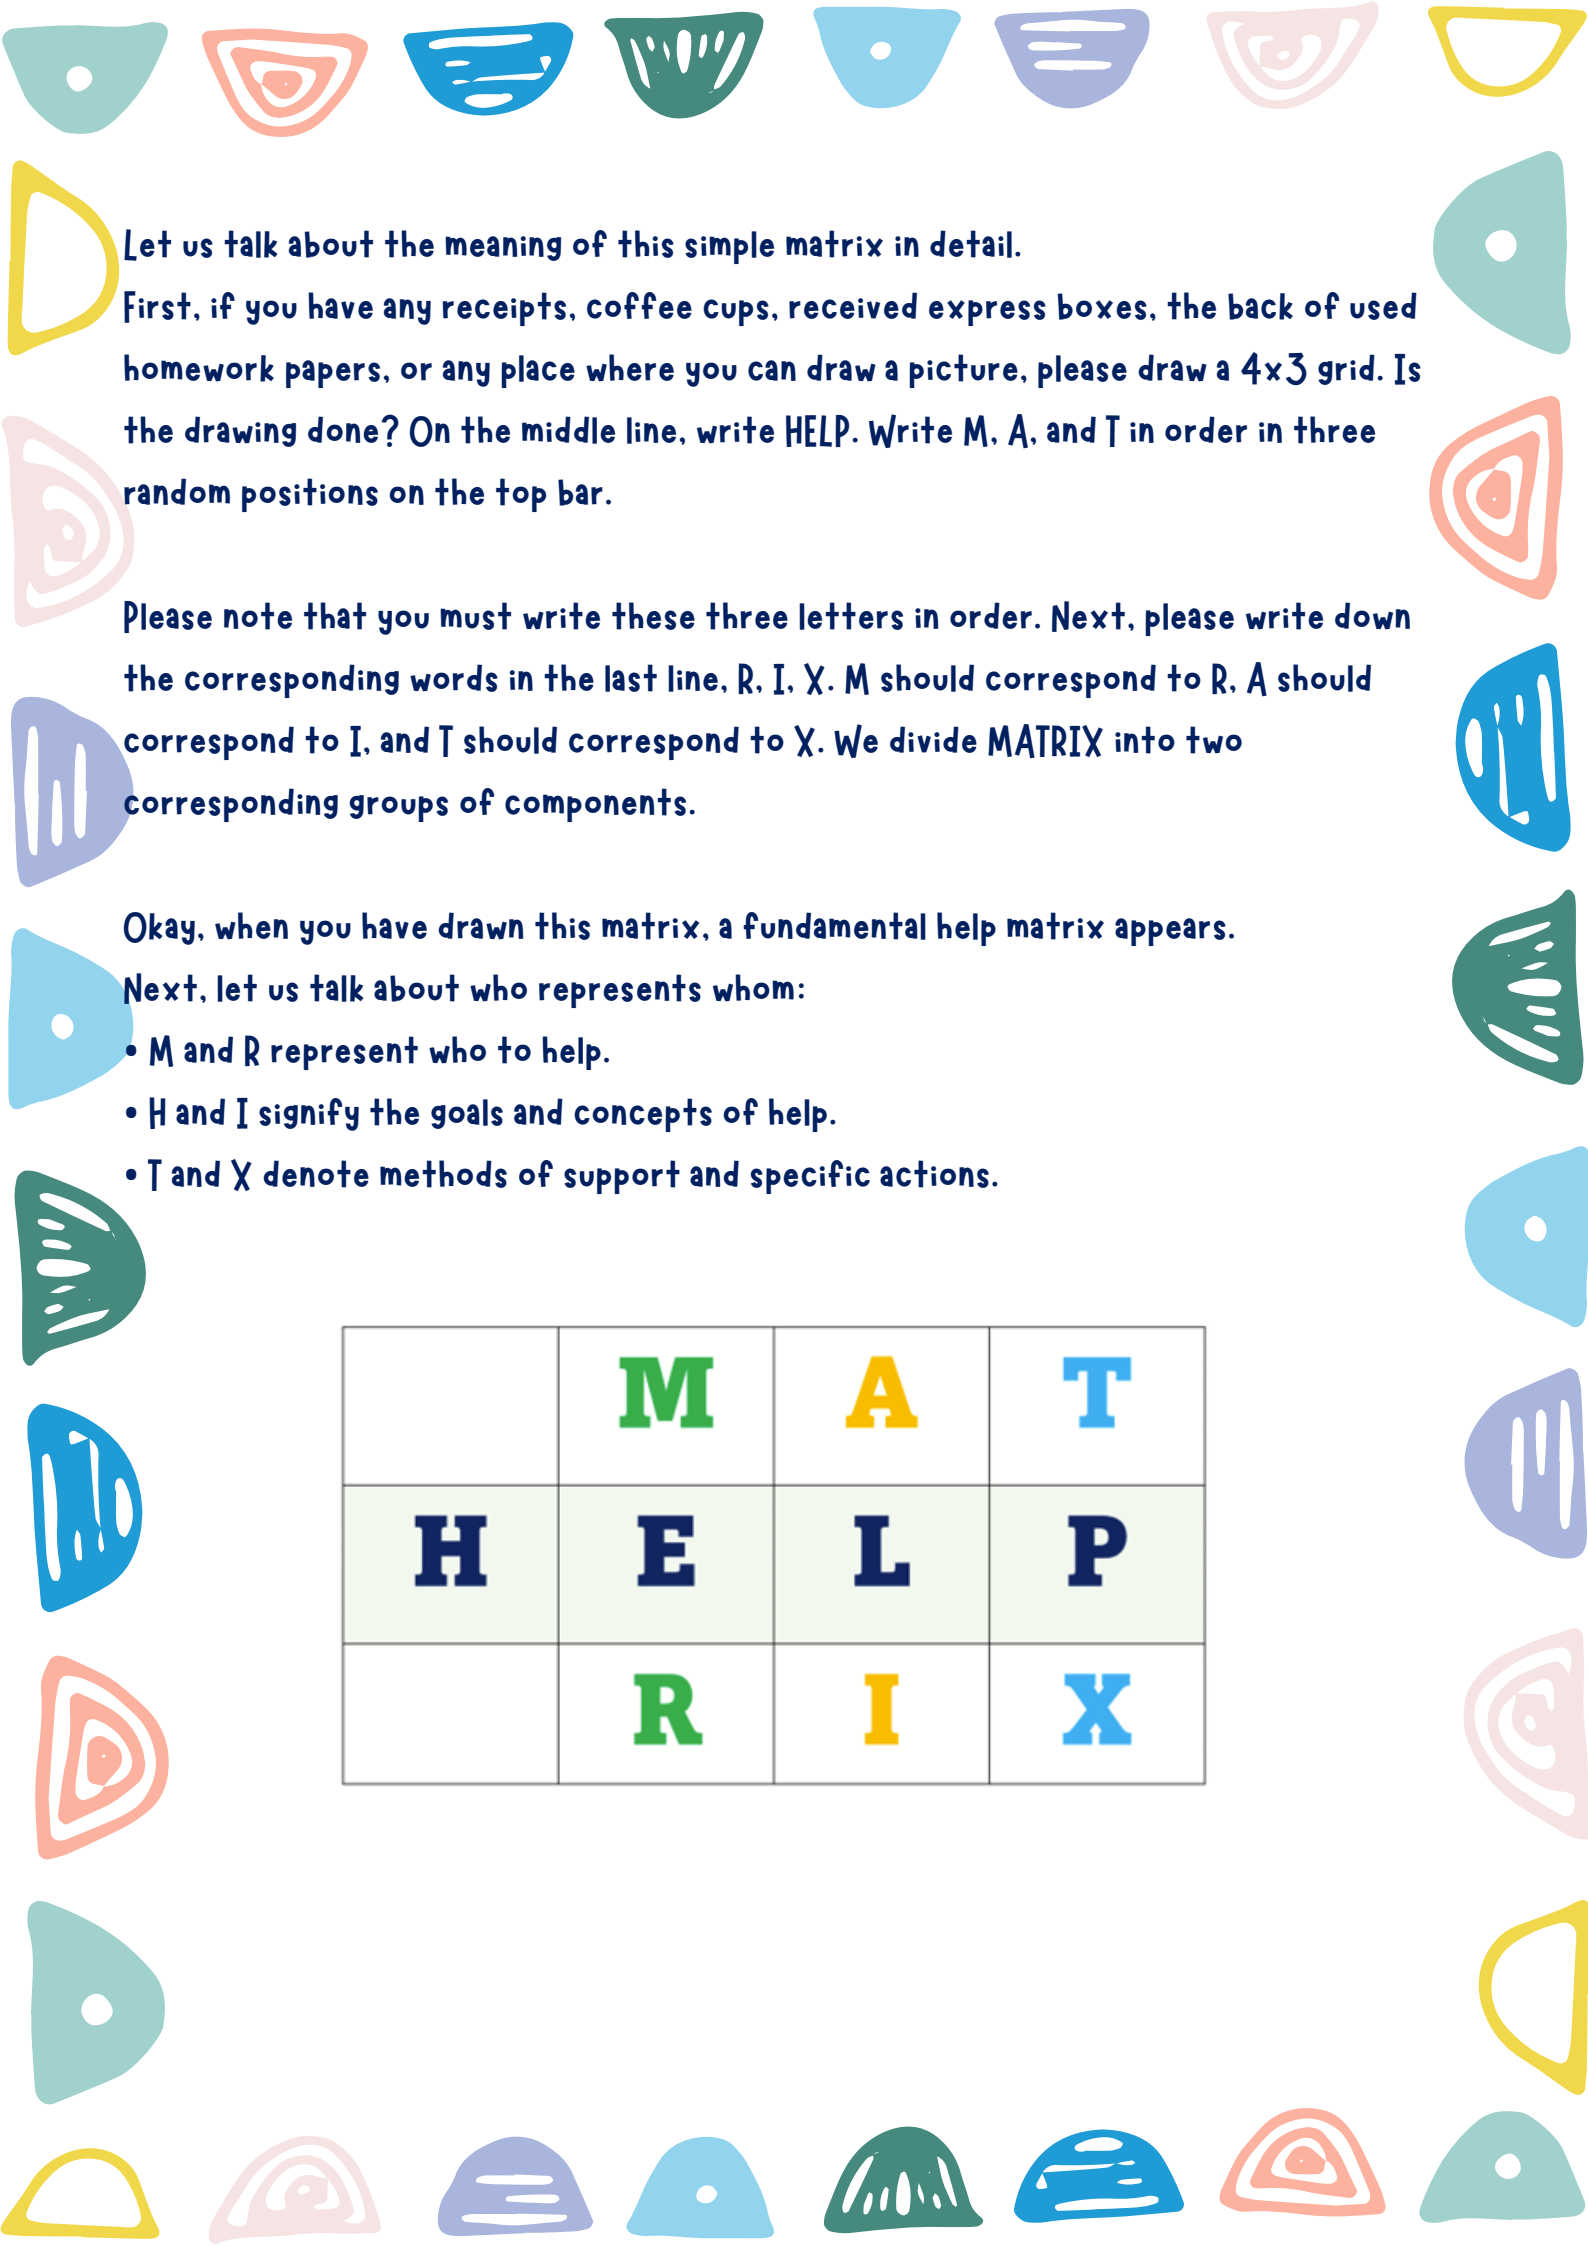

SECOND QUESTION: WHAT IS THE GOAL FOR HELP?

- HELP OBJECTIVE
- I – WHAT THE RESULT (IMAGINATION)

THE THIRD QUESTION: HOW TO HELP?

- T – HOW TO (WITH THE PLAN)
- X – DETAILS ACTIONS

BASIC CONCEPT OF HELP MATRIX: Help is the core of **HELP MATRIX**. Many people believe that the heart of creation lies in expressing the creator's thoughts. But in the early education industry, the essence of design is helping. However, many people do not know that help needs to follow a specific architecture. I do not understand; why should I help? Who to help? How to help, really help? **HELP MATRIX** is to assist all early childhood education creators, practitioners, and businesses by providing a new, fast production, that is, a creative idea. This approach will enhance your early childhood education career and business development.

Let us talk about the meaning of this simple matrix in detail.

First, if you have any receipts, coffee cups, received express boxes, the back of used homework papers, or any place where you can draw a picture, please draw a 4x3 grid. Is the drawing done? On the middle line, write **HELP**. Write **M**, **A**, and **T** in order in three random positions on the top bar.

Please note that you must write these three letters in order. Next, please write down the corresponding words in the last line, **R**, **I**, **X**. **M** should correspond to **R**, **A** should correspond to **I**, and **T** should correspond to **X**. We divide **MATRIX** into two corresponding groups of components.

Okay, when you have drawn this matrix, a fundamental help matrix appears.

Next, let us talk about who represents whom:

- **M** and **R** represent who to help.
- **H** and **I** signify the goals and concepts of help.
- **T** and **X** denote methods of support and specific actions.

	M	A	T
H	E	L	P
	R	I	X

D You may ask, how can these help methods be listed? Then, we will evaluate how to use this help matrix based on the following steps.

- M – MOMMY
- R – WHOM TO HELP WHO
- A – HELP OBJECTIVE WHAT
- I – WHAT THE RESULT (IMAGINATION)
- T – HOW TO (WITH THE PLAN)
- X – DETAILS ACTIONS HOW

M Let us test it out five times before formalizing the problem you need to solve on your own.

M Before evaluating this magic template in real life, let's try it in some hypothetical cases 5 times.

TEST 1 The child will not eat even if he is alive and will not eat vegetables even if he dies. What should you do? – Use **HELP MATRIX** analysis.

TEST 2 You are a newly graduated professional lawyer determined to engage in family law cases. Still, your children's parents do not trust you because you are too young, unmarried, and single. What should I do if I can't pay the rent because I have no case source? – Analysis using **HELP MATRIX**.

TEST 3 You are a newly graduated kindergarten teacher and are also facing the problem of being unable to afford a house. What should you do? – Use **HELP MATRIX** analysis.

TEST 4 You are a local mall that sells educational toys. Monopoly has been waiting to sell a set for a month. (This case is just a teaching case. We and Monopoly are excellent friends. HUNTER likes it. (played) What should I do? – Use **HELP MATRIX** analysis.

TEST 5 Your family was deceived into buying a house and land in Athens, Greece. The rent is Zero. How about selling it at a low price? Do you want to increase your income? What to do? Analysis using **HELP MATRIX**.

DISCUSS FIVE CASES ONE BY ONE:

i. The child refuses to eat vegetables, no matter what approach you try. What should you do? – Please use the **HELP MATRIX** to sketch a solution in 1 minute.

	M	A	T
H	E	L	P
	R	I	X

Okay, now let's randomly choose six letters for the **MATRIX** framework. The initials don't have to be **MATRIX**; they're just a framework.

- M & R represent the objects of help, and nouns are the best choice for this part of speech.
- A & I represent the targets of service and can be any part of speech.
- T & X represent the steps of help and can be any part of speech

	M: McDonald's	A: ATTACK	T: WATCH
H	E	L	P
	R: RED-CROSS	I: I " I"	X: Determination

HELP MATRIX

	M	A	T
H	E	L	P
	R	I	X

WHO: Next up is McDonald's. What kind of innovations can they make? To limit the content, we'll focus on five creations:

- M (McDonald's): Increase the amount of lettuce in McDonald's burgers, from one serving to two servings; expand the variety of vegetables: milk, chicken wings, color, black and white, plasticine, Saturn, ** Colorful McDonald's
- R (RED-CROSS): The Red Cross that can be eaten, the Red Cross that can slide, the Red Cross that can transform, the Red Cross that can compose its music

WHAT:

- A (ATTACK): cute; green; convertible; sweet
- I (I): Colorful, transformable, desk figure, pumpkin, small alarm clock

HOW:

- T (WATCH): Records the time of an alien planet; can fly; can eat; can cry; can melt.
- X (DETERMINATION): Like a bow and arrow, like flowing water, being a waiter, being a piglet, being a broken light bulb.

THE CHILD REFUSED TO EAT VEGETABLES IN ANY WAY YOU CAN IMAGINE. WHAT SHOULD YOU DO?

WHO:

- M (McDonald's): Increase the amount of lettuce in McDonald's burgers, from one serving to two servings; expand the variety of vegetables to include options like milk, chicken wings, various colors, black and white, plasticine, and even Saturn-themed items for a more vibrant McDonald's experience.
- R (RED CROSS): Explore edible versions of the Red Cross, ones that can slide, transform, or even compose their own music.

WHAT:

- A (ATTACK): Cute, green, convertible, sweet.
- I (I): Colorful, transformable, desk figure, pumpkin, small alarm clock.

HOW:

- T (WATCH): Records the time of an alien planet; can fly; can eat; can cry; can melt.
- X (DETERMINATION): Like a bow and arrow, like flowing water, being a waiter, being a piglet, being a broken light bulb.

Every child is born with the potential to help others and the planet. As parents, what we need to do is to inspire children, in an imaginative way they enjoy, to harness their endless potential to make a positive impact.

For instance, in this scenario, we combine six words in various combinations to illustrate how this help structure is generated.

So, let's think about it. Who can we help? (McDonald's – by increasing the lettuce servings) and (Red Cross – by creating their music). What's our goal? (Reducing green consumption + becoming a desk figure) and how will we do it? (By using a watch that records the timetable of an alien planet + having the determination to be a server).

Great! The first help matrix is complete.

Now, let's imagine together.

We can convey this message to children:

'DEAR CHILDREN. IF YOU INCREASE THE PROPORTION OF VEGETABLES, YOU EAT AND REDUCE THE FREQUENCY OF MEAT-BASED CHICKEN DRUMSTICKS. YOU CAN USE A WATCH THAT RECORDS THE TIME OF AN ALIEN PLANET AND DEVELOP A STRONG WILL TO BE A SERVER.'

By accurately monitoring the time and schedule of an alien planet, and by serving all the lovely life on this Earth with a caring heart, we can reduce the number of health issues caused by insufficient greens. This means that with a more flexible and healthier body, people will face fewer challenges while climbing or encountering water.

Through our experiments, we can help two wonderful entities: McDonald's and the Red Cross.

McDonald's can transition from one serving of lettuce to two, and the Red Cross can incorporate their music into McDonald's, offering it as background music to users worldwide.

So, what do you think?

If your little one needs a simpler explanation, you can put it this way:

You noticed that there was only one serving of lettuce at McDonald's.

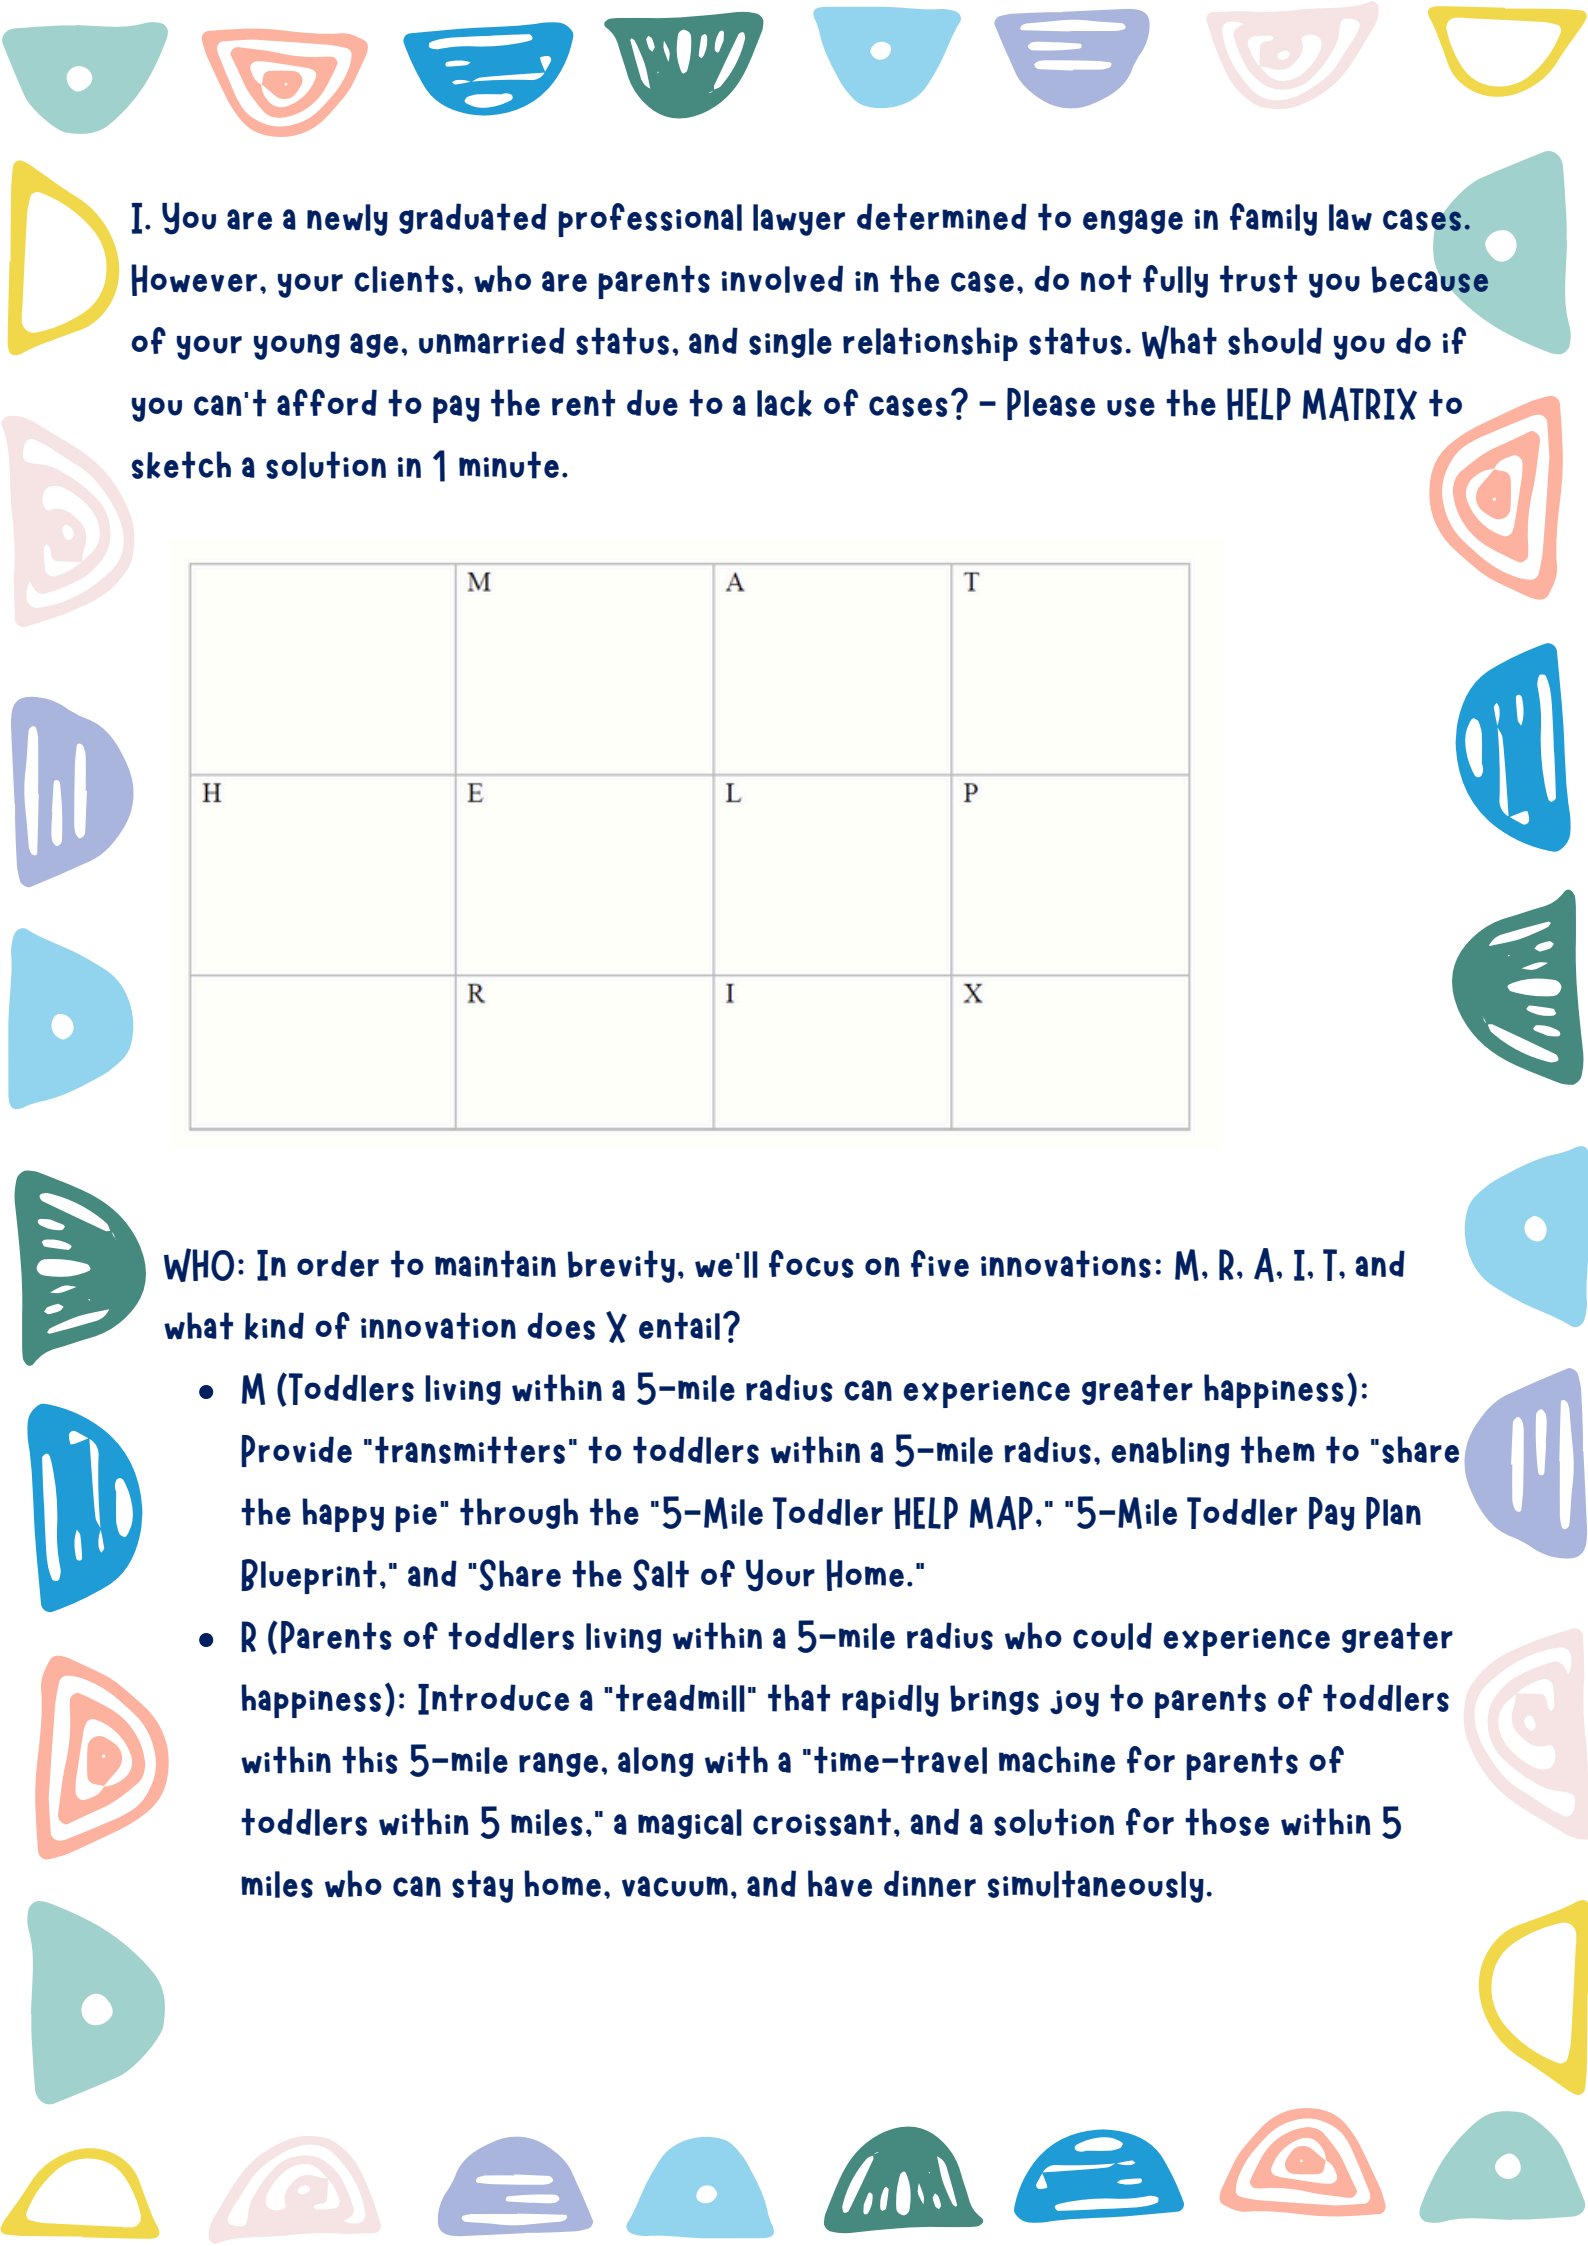

IF THERE WERE TWO SERVINGS, PEOPLE AROUND THE WORLD WOULD EAT FEWER HAMBURGERS AT DIFFERENT TIMES, THANKS TO THE GREEN BOOST. THIS IS BECAUSE GREEN IS MORE PLENTIFUL THAN RED. THE CROSS WILL ALSO BECOME MORE ADAPTABLE, ALLOWING PEOPLE TO CREATE EVEN BETTER MUSIC, NOT JUST THROUGH AI.

Shall we work together to help McDonald's, little one?

I. You are a newly graduated professional lawyer determined to engage in family law cases. However, your clients, who are parents involved in the case, do not fully trust you because of your young age, unmarried status, and single relationship status. What should you do if you can't afford to pay the rent due to a lack of cases? – Please use the HELP MATRIX to sketch a solution in 1 minute.

	M	A	T
H	E	L	P
	R	I	X

WHO: In order to maintain brevity, we'll focus on five innovations: M, R, A, I, T, and what kind of innovation does X entail?

- M (Toddlers living within a 5-mile radius can experience greater happiness): Provide "transmitters" to toddlers within a 5-mile radius, enabling them to "share the happy pie" through the "5-Mile Toddler HELP MAP," "5-Mile Toddler Pay Plan Blueprint," and "Share the Salt of Your Home."
- R (Parents of toddlers living within a 5-mile radius who could experience greater happiness): Introduce a "treadmill" that rapidly brings joy to parents of toddlers within this 5-mile range, along with a "time-travel machine for parents of toddlers within 5 miles," a magical croissant, and a solution for those within 5 miles who can stay home, vacuum, and have dinner simultaneously.

WHAT: | Target of help

- A (They all became happy): As delighted as bananas, colorful mood, peanuts, pumpkins, tomatoes
- I (hopeful, full of energy): Sunflower seeds, sunflowers, sunflowers grown in the sea, cauliflower 'growing' in water, juiced from peanuts.

HOW: | How to help

- T (FLOWER): The flower that can eat, the sunflower that can talk, the lotus that can listen, the orchid that can help you wash the dishes, the dried orchid that can write
- X (SUNSHINE): A base that produces its sunlight, a 'sunshine' diffuser that can spread all over the world in one second, a juicer that can convert sunlight into drinkable water, a 'piggy bank' that can store sunlight. Sharing love and sunshine

Let's work with you to create a set of card ideas within 1 minute. As long as you make it, we will help you sell it!

	M	A	T

	M	A	T
H	E	L	P
	R	I	X

Okay, the current situation is that we have to combine these words into a sentence and then explore the possibilities within.

First, this is the sentence we wrote before; we can also make slight modifications based on this template.

SAMPLE: Let's help who (McDonald's — 1st serving of lettuce) and who (Red Cross — Red Cross who can make their music) achieve the goal (reduce green attack + table person) by (using the ability to record the timetable of an alien planet + the determination and will to be a server).

APPLICATION IN THIS CASE: Let's help who (M (a toddler within 5 miles of you who could be happier)) and who (R (a toddler's dad or mom who is within 5 miles of you and could be happier)) achieve their goals ((A (They all become happy) + I (Hopeful and energetic))). The method is (T (FLOWER) + X (SUNSHINE)).

Okay, we have completed the construction of the primary building. Now, let's play the crossword puzzle.

We randomly combined such a combination among the five words we just made, and then we made such a combination.

We're here to help who (M (a toddler who could become happier within 5 miles of you) receives a "transmitter" for a toddler who is within 5 miles of you) and who (R (who could become a happier child less than 5 miles from you, 5 Mile Toddler Dad, Toddler Mom)). 5 Mile Toddler Parent — Magic Croissant) Achieving Goals ((A (They all became happy) + I (Hopeful and energetic) Pumpkins + Planted in the Sea Sunflower). The method is (T (FLOWER) + X (SUNSHINE), a flower that can eat + a juicer that can convert sunlight into drinkable water).

OK, let's get started! Back to our previous question.

YOU ARE A NEWLY GRADUATED LAWYER DETERMINED TO ENGAGE IN FAMILY LAW CASES. HOWEVER, YOUR CHILDREN'S PARENTS DO NOT TRUST YOU BECAUSE YOU ARE TOO YOUNG, UNMARRIED, AND SINGLE. YOU HAVE NO CASE SOURCE AT ALL, AND THE RENT IS HIGH. WHAT SHOULD YOU DO IF YOU CAN'T AFFORD IT? -PLEASE USE HELP MATRIX TO SKETCH THE SOLUTION IN 1 MINUTE.

	M	A	T
H	E	L	P
	R	I	X

We are pleased to present the preliminary solution outlined below:

Our objective is to assist two key groups: toddlers residing within a five-mile radius of your location and parents of toddlers within the same proximity. This includes under-five-mile toddler fathers and mothers. Through our proposed initiatives like the "5 Mile Toddler Parents – Magic Croissant," we aim to foster contentment and well-being. This endeavor aligns with our commitment to ensuring that all individuals involved experience genuine happiness. To this end, we propose a comprehensive approach encompassing an array of activities such as the cultivation of pumpkins and sunflowers in seawater, all supported by a framework combining the flower's consumption and the conversion of sunlight into potable water.

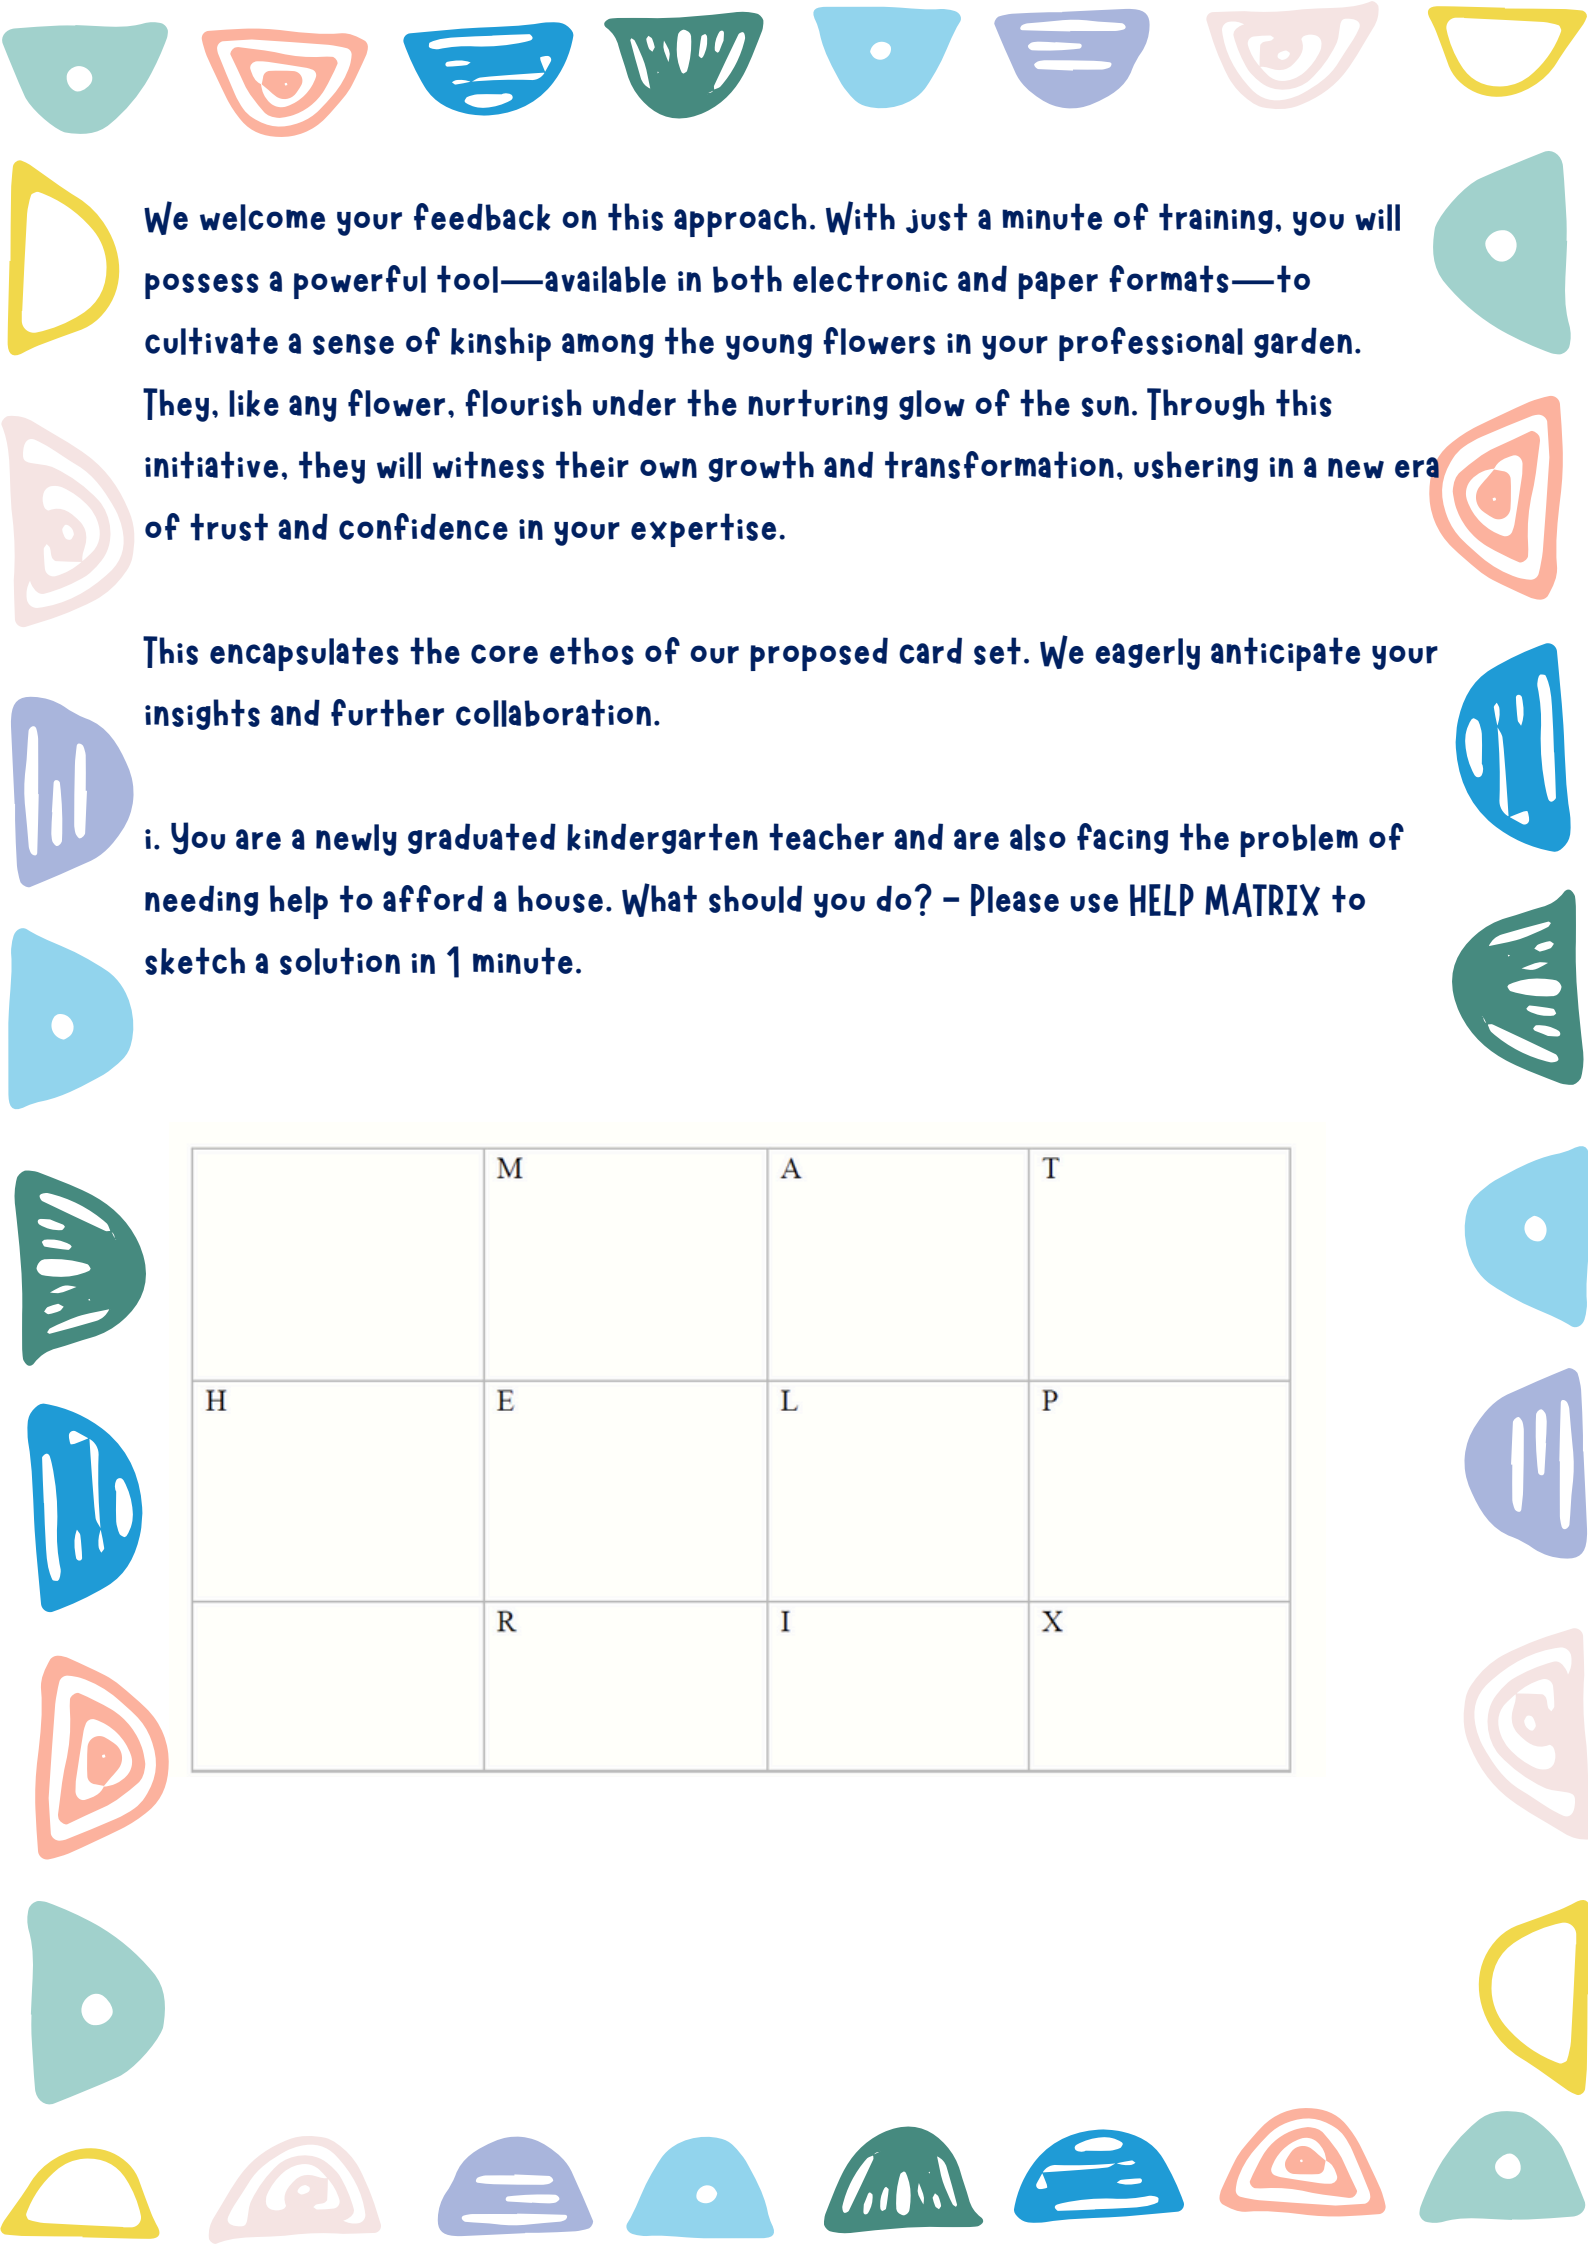

Given your recent graduation and your aspiration to establish a unique professional trajectory, we understand the need for a fresh approach. It is imperative to cultivate trust and credibility among potential clients, especially considering your relative youth and need for additional experience.

Allow us to introduce a succinct one-minute card deck, tailored to address the particular needs of toddlers and parents residing within a five-mile radius of your location. This dynamic demographic could include neighbors within your residential community, parents within your office building, or even colleagues who are parents of young children. Through the strategic implementation of specialized tools such as our innovative happiness sensor, transmitter, and magic croissant, we endeavor to bring about the same level of joy and contentment witnessed in pumpkins and sunflowers thriving in seawater. The crux of our methodology lies in the utilization of a flower that is not only edible but also a juicer capable of transforming sunlight into a potable form.

In essence, our approach revolves around creating an environment of perpetual happiness. The magic lies within our extraordinary sensors and the transformative power of the magic croissant. Just as a flower thrives on sunlight, so too can we derive sustenance from our collective happiness. This innovative card deck encapsulates one hundred heartwarming scenes of flowers in the act of consumption, coupled with a meticulously crafted ten-step guide to converting sunlight into a life-sustaining elixir.

The sunshine we collect represents the goodwill and positivity we endeavor to disseminate throughout our communities. By inadvertently transforming this positivity into a life-giving force, we establish a source of vitality that mirrors the very essence of life itself. In your legal practice, this radiance will serve to warm the hearts of those around you, demonstrating the inherent value you bring to their lives.

We welcome your feedback on this approach. With just a minute of training, you will possess a powerful tool—available in both electronic and paper formats—to cultivate a sense of kinship among the young flowers in your professional garden. They, like any flower, flourish under the nurturing glow of the sun. Through this initiative, they will witness their own growth and transformation, ushering in a new era of trust and confidence in your expertise.

This encapsulates the core ethos of our proposed card set. We eagerly anticipate your insights and further collaboration.

i. You are a newly graduated kindergarten teacher and are also facing the problem of needing help to afford a house. What should you do? – Please use **HELP MATRIX** to sketch a solution in 1 minute.

	M	A	T
H	E	L	P
	R	I	X

WHO: To limit content, only five innovations will be made. M, R A, I T, what kind of innovation does X make?

- **M** (Help the skinniest little boy in my class, nourish and strengthen him): Volcano, Salt Lake, soda water, fireworks, Sichuan peppercorns
- **R** (Helping the family with the thinnest kid in my class, family nutrition + family strength): Timetable, raccoon, lightning, Picasso, a wall

WHAT: | Target of help

- **A** (Within 30 days, the child in the class became incredibly strong and healthy): battery, crab, oil, desert, fresh water.
- **I** (Bonfire party for the whole class to strengthen physically and mentally): Fireflies, broccoli, New Year's cards, forest, waves.

HOW: | How to help

- **T** (time): reversal, deceleration, green, the number 6, desk lamp
- **X** (natural): folder, coconut water-like (natural), spicy (natural), bookcase (natural), kettle (natural)

WHO: To limit content, only five innovations will be made. M, R A, I, T, what kind of innovation does X make? M (Help the skinniest little boy in my class, nourish and strengthen him). R (Helping the family with the thinnest child in my class, focusing on family nutrition and strength)

WHAT: | Target of help

- A (Within 30 days, the child in the class became incredibly strong and healthy)
- I (Bonfire party for the whole class to strengthen physically and mentally)

HOW: | How to help

T (time):

X (natural):

SAMPLE: Let's help who (McDonald's — 1st serving of lettuce) and who (Red Cross — Red Cross who can make their music) achieve the goal (reduce green attack + table person) by (using the can record the timetable of an alien planet + the determination and will to be a server)

	M	A	T
H	E	L	P
	R	I	X

APPLICATION IN THIS CASE: Who are we going to help (the thinnest little boy in my class, focusing on nutrition and strength) and who (help the family of the most delicate child in my class, emphasizing family nutrition and family strength) to achieve their goals (within 30 days ensuring the child in the class is robust and healthy + organizing a campfire party for the whole class to be physically and mentally strong). The method involves (T (time) + X (natural)).

Okay, we have completed the construction of the primary building. Now, let's play the crossword puzzle. Continue with word selection.

APPLICATION IN THIS CASE: Who are we coming to help (the skinny little boy in my class, emphasizing nutrition and strength – Salt Lake) and who (help the skinny little boy in my class's family, focusing on family nutrition and family strength – Raccoon). To achieve the goal (in 30 days, that kid in the class will be solid and healthy – Crab + organizing a bonfire party for the whole class to be physically and mentally strong – Broccoli), the method involves (Green T (Time) + X (Natural) – Coconut water-like (natural)).

Good! Let's continue this lovely matrix game. After playing this far, do you feel like you don't need us anymore? Hahahaha! Returning to this topic again, "You are a newly graduated kindergarten teacher, and you are also facing the problem of not being able to afford a house. What should you do? – Please use HELP MATRIX to sketch the solution in 1 minute."

The target we want to help is the thinnest boy in our class (Salt Lake method), and we support the family of the skinniest boy in our category (Using the raccoon method). The goal is that within 30 days, not only this little boy (using the Crab method) but the whole class of young boys become incredibly strong (Using the Broccoli method). Specifically, our specific measures are to use green time and the natural properties of coconut water to help them.

Hahaha, does this look like a PUZZLE? Let's solve it together. If this set of cards signs a copyright contract with Matrix Kids Cards, we will sell it worldwide. It's specially designed to address the issue of a few students in kindergarten who don't like to eat. The categorized cards will be based on specific scenarios when our method is applied worldwide. So, let's solve this little trouble in this class now!

FIRST. THE TIME THE TEACHER SPENDS ON EACH STUDENT CAN BE LIMITED BECAUSE SOME EMERGENCIES IN THE KINDERGARTEN CLASS CAN HAPPEN AT ANY TIME. Even if you pay more attention to him, his every meal is independently supervised, which may not necessarily be possible. One that gets the job done. So, currently, we must tell the children and always remember that our targets are young children and their families. The real task we need to complete is to ask this child and all the children in the class whether they want to help.

LET'S HELP THE CHILDREN NEAR SALT LAKE CITY AND THE ENDANGERED RACCOONS.

(Please note that teachers and parents do not necessarily let our children know that the object of help is a specific person; it can be a group of small animals.) We can use the Crab method to help this little boy and the Broccoli method to help all the children in the class. The whole class. Our class first set a goal to help.

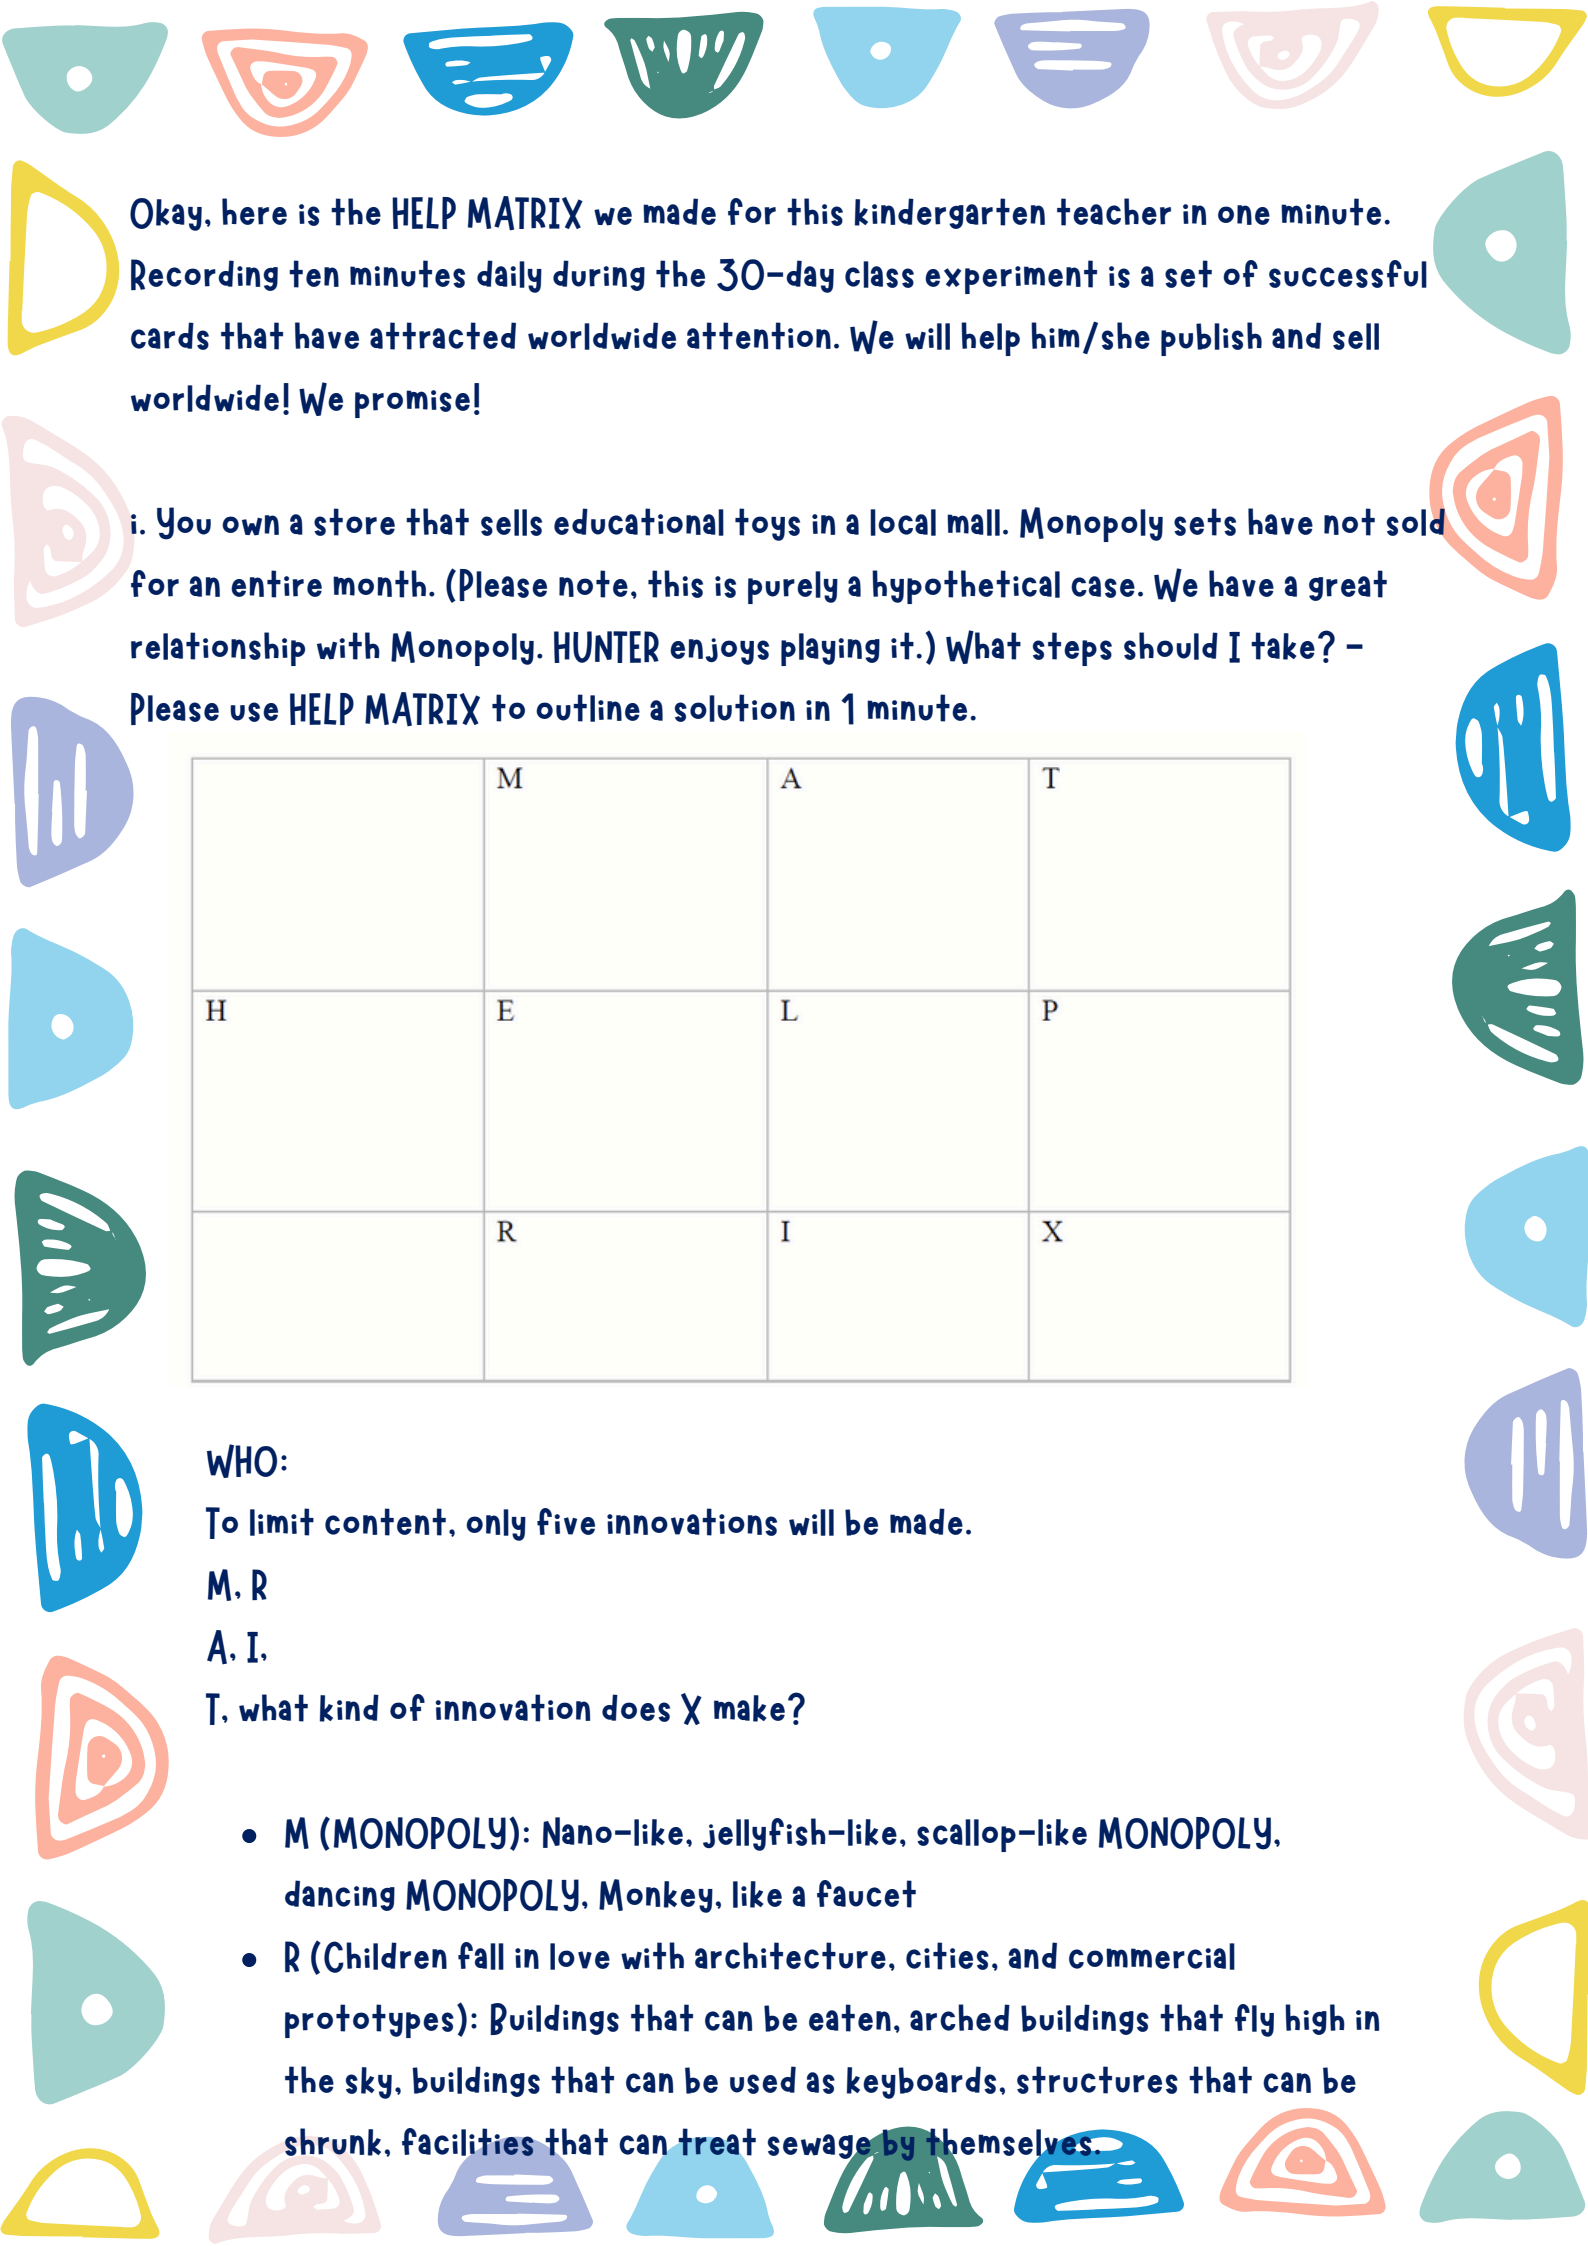

So first, we experimented with crabs swimming around our class, in the class outside. We first caught an edible crab (male or large), and then we were asked to keep a daily record of the crab's daily routine to see what the crab liked to eat the most. What ingredients can make crabs gain weight and increase their bones? (we need help from specialized doctors).

The way of broccoli is that our entire class has opened a broccoli food court dedicated to our class. The children work together daily to use broccoli with their favorite ingredients and create the most delicious dishes. Parents share, share with the community without wasting food.

More specifically, our measures are to use green time and nature, like coconut water, to help them.

We must tell all the children that when we care for nature and human beings, including ourselves, we use green time, so we must use our little hands to draw our own daily green time, the healthiest time.

At the same time, our tool is as natural as coconut water. As wild and lovely as coconut water, we must tell the children the most straightforward way: if we need coconut water, we must climb the tree ourselves. Every natural ingredient can be well-spent. Like coconut water, we can use the flowing, lovely, milky white water. Naturally, I produce coconut oil, drink coconut juice, and make coconut cakes. We can!

Okay, here is the **HELP MATRIX** we made for this kindergarten teacher in one minute. Recording ten minutes daily during the 30-day class experiment is a set of successful cards that have attracted worldwide attention. We will help him/she publish and sell worldwide! We promise!

i. You own a store that sells educational toys in a local mall. Monopoly sets have not sold for an entire month. (Please note, this is purely a hypothetical case. We have a great relationship with Monopoly. HUNTER enjoys playing it.) What steps should I take? – Please use **HELP MATRIX** to outline a solution in 1 minute.

	M	A	T
H	E	L	P
	R	I	X

WHO:

To limit content, only five innovations will be made.

M. R

A. I.

T, what kind of innovation does X make?

- **M (MONOPOLY):** Nano-like, jellyfish-like, scallop-like **MONOPOLY**, dancing **MONOPOLY**, Monkey, like a faucet
- **R (Children fall in love with architecture, cities, and commercial prototypes):** Buildings that can be eaten, arched buildings that fly high in the sky, buildings that can be used as keyboards, structures that can be shrunk, facilities that can treat sewage by themselves.

WHAT: | Target of help

- A (Small store, achieving MONOPOLY sales of 3,000 units in a month): The neon-like sales chain can generate water vapor sales, and the peanut cloud sales chain can instantly return to zero sales experience, slowing down sales.
- I (Children from all over the county come to participate in the MONOPOLY experience exhibition): An edible experience exhibition, a pipe-like experience exhibition, a red dragon fruit experience exhibition, an experience exhibition where exhibits can be torn apart at will without any compensation and shows set on fire. A well-preserved experience exhibition in Yamaguchi

HOW: | How to help

- T (Library): A library that can be made big or small (without cost), a library that can be eaten (whether it's crazy or not), a library that can be changed every day (tear down today, repair tomorrow), remote borrowing, a library that can be instantly accessed (whether it's magical or not), a library that can self-publish and be collected immediately.
- X (Water): Turning volcanic ash into drinkable water, it can become super delicious, but it is drinking water, angry water, water that costs money (whether it's magical or not); the water quality will be automatically detected and realized automatically. Self-purifying water.

	M	A	T
H	E	L	P
	R	I	X

SAMPLE: Let's help who (McDonald's — 1st serving of lettuce) and who (Red Cross — Red Cross who can make their music) achieve the goal (reduce green attack + table person) by (using the can record the timetable of an alien planet + the determination and will to be a server).

Okay, we have completed the construction of the primary building. Let's arbitrarily break each part into different ideas and randomly select one. Let's play a filling game.

The result of randomly forming words is this:

Let's help who (M (MONOPOLY) can dance MONOPOLY) and who (R (children fall in love with architecture, cities, and commercial prototypes)) can build buildings with self-sewage treatment to achieve the goal (A (small shop, committed to one month, 3,000 MONOPOLY sales) Slow down sales + I (Children from all over the county come to participate in the MONOPOLY experience exhibition) The method of the experience exhibition where you can tear up the exhibits at will without paying a penny is (T (library) can borrow remotely, the library that reaches + X (water) instantly will automatically monitor the water quality and automatically purify the water source).

Remember what the problem was?

Let's go back to the problem now.

i. QUESTION YOU ARE A LOCAL MALL SELLING EDUCATIONAL TOYS. MONOPOLY HAS NOT SOLD ANY SET FOR A MONTH. (THIS CASE IS JUST A TEACHING CASE. WE AND MONOPOLY ARE VERY, VERY GOOD FRIENDS. HUNTER LIKES TO PLAY). WHAT SHOULD I DO? – PLEASE USE HELP MATRIX TO SKETCH THE SOLUTION IN 1 MINUTE.

In other words, we are now using this local MALL that sells educational toys to create a set of cards suitable for playing Monopoly locally. We sell 3,000 copies per month locally and globally. We are using the combined result above. How to do it?

Let's think about it now and take a few minutes to solve this problem.

Only one can dance. I understand it is a chess and card game that can use a dance rhythm to perform its chess and cards. The gameplay of this set of chess and cards can be like dancing, with the rhythm of music. The focus of the help is to tell young children and their parents, share it with them, and create a building model for self-processing sewage with the children.

In other words, we will create a unique set of architectural styles in this small educational game toy store to help Monopoly find exclusive help to create self-processing sewage, blooming in music and rhythm. This is who we help.

Specifically, the goal we want to achieve is to slow down sales first. One set has yet to be sold, so how can we slow down? We aim to suspend the sales of this specific set of Monopoly cards. (The online store mode also shows it is temporarily out of stock.) At this time, we want children and parents of young children from all over the county to come to our store and participate in a place where they can tear up the exhibits (in this case, educational games) for free. Help them reduce stress.

The specific method is a library that can be reached instantly through remote borrowing and a water source that can automatically detect water quality and realize self-purification.

In other words, we need all the books that can be reached instantly to accumulate to the point where we are now. In other words, this small shop, a simple small shop, can now become a global automatic monitoring of water quality. Although inconspicuous, it is a scientific research, information, and integration center for self-purifying water sources.

The specific ideas are already obvious! Through Monopoly's chess and card game, we applied for Monopoly's commercial use authorization and shared profits with Monopoly through commercial cooperation. Next, we must create architectural models to generate and process sewage in music.

In Monopoly, we have designed multiple locations around the world with different architectural styles, and their sewage treatment methods can become the Paris method, the New York method, and the Rio de Janeiro method; these methods all appear in the chess game rhythmically, and at the same time, they are researched and solved by global research institutions, information centers, and individuals (not just limited to experts) to solve the problem of self-detection of water quality and self-purification of water sources. Practitioners of this kind of work in this small shopping mall, this quiet puzzle game store in an inconspicuous location, has become the center of this kind of information and scientific research center in the world in the shortest time. At the same time, we invite all young children and their families in the county to participate in an experiential exhibition where you can tear down the exhibits at any time.

All the more than 100 types of educational games we currently sell will be available with authorization. Go to their respective introductions, contact a printing shop, print over 100 sets of card boxes with the names of educational games and a one-sentence introduction as the main content, and then invite all children and their parents in the county to tear them up for free. Crazy enough? Send the torn survey structure to all puzzle game manufacturers and authorize the use of all (for example, what type of information causes users the most anger? What kind of information resonates the most with users? The core information that forms soul resonance with users), so that this company The tiny little toy store became a licensee.

Cool. Isn't it? This is the result of 1 minute of HELP MATRIX thinking.

Please remember that to save time, we only selected five words and five lists, and in the final combination, we only chose one of the five words to have such a good structure. What about doing all five words again? There are at least 25 sets of plans. How many entries does a dictionary suitable for ordinary readers usually contain? And that's not counting how many languages and similar artificial intelligence help exist worldwide. The possibilities are limitless. If you believe it, believe us! Believe in the power of help! Believe in the power of HELP MATRIX!

D i. YOUR HOUSE AND LAND ARE IN A SMALL TOWN IN GREECE WITH FEW TOURISTS. THE RENT IS 0. HOW ABOUT SELLING IT AT A LOW PRICE? DO YOU WANT TO INCREASE YOUR INCOME? WHAT TO DO? – PLEASE USE HELP MATRIX TO SKETCH A SOLUTION IN 1 MINUTE

	M	A	T
H	E	L	P
	R	I	X

WHO: To limit content, only five innovations will be made.

M, R A, I, T, what kind of innovation does X make?

- M (people all over the world know Greece, my town): A city where you can talk directly to aliens (this is not a scam), a town where summer can turn into winter, a musical theater town, a magic town, a town where all B&Bs are open to the world for free every Wednesday.
- R (Bathroom renovation at my B&B): Groundwater circulation system, pipe reconstruction, natural methods, friction, and water-saving

WHAT: | Target of help

- A (The whole world falls in love with the town where our B&B is located): As many as 10.000.000 letters are written to our B&B a day, peanuts, dolphins, direct drinking water, seaweed.
- I (The number of reservations increased instantly by 20 times): Milk, watermelon, computer keyboard, hamburger-shaped arch bridge, rhinocero.

WHAT: | Target of help

- A (The whole world falls in love with the town where our B&B is located): As many as 10.000.000 letters are written to our B&B a day, peanuts, dolphins, direct drinking water, seaweed.
- I (The number of reservations increased instantly by 20 times): Milk, watermelon, computer keyboard, hamburger-shaped arch bridge, rhinocero.

HOW: | How to help | Randomly combine words here

- T (coffee): rainbow, library, Ferris wheel, olive oil, red pepper.
- X (mineral water): coffee flavor, backflow, greenery, croissant, Sala

	M	A	T
H	E	L	P
	R	I	X

SAMPLE:

Let's help:

- McDonald's (1st serving of lettuce)
- Red Cross (Red Cross that can create their music)

achieve the goal (reduce green attack + table person) by (using the ability to record the timetable of an alien planet + the determination and will to be a server).

APPLICATION IN THIS CASE:

We are here to help:

- M (people all over the world know about Greece, the town where I live)
- R (renovation of bathrooms in my B&B)

To achieve their goals:

- A (the whole world falls in love with the town where our B&B is located)
- I (make an appointment, the number of people increases instantly by 20 times).

The method is:

- T (coffee)
- X (mineral water).

Okay, let's take a minute to create this set of cards exclusive to your B&B to benefit toddlers and toddler families worldwide. Let's start now! We are so excited!

With Matrix kids' cards, we are helping with two things now. One is to help the unknown Greek town where I live to let children worldwide know about it. Second, we need to help our B&B repair the bathroom. Due to the shortage of maintenance funds, the toilet has been leaking. Our goal is to make toddlers and toddler families all over the world fall in love with our unknown Greek town + The number of daily reservations suddenly increased 20 times (compared to the number of reservations in the same period); the method is straightforward, (coffee + mineral water).

Okay, we have completed the construction of the primary building. Now, let's play the crossword puzzle.

We are helping with two things now. One is to help the unknown Greek town where I live to let children worldwide know about it. Second, we need to help our B&B repair the bathroom. Due to the shortage of maintenance funds, the toilet has been leaking. Our goal is to make toddlers and toddler families all over the world fall in love with our unknown Greek town + The number of daily reservations suddenly increased 20 times (compared to the number of reservations in the same period); the method is straightforward, (coffee + mineral water).

Okay, next, let's combine the different positions of these two combinations and randomly combine them into such a structure.

Who are we here to help (M (people worldwide understand Greece, the town where I am))? All B&Bs provide free services to the city and (the B&B where I am repairing the bathroom) every Wednesday. To achieve the goal: (A (the whole world fell in love with Laver, the town where our B&B is located + I (the number of reservations increased instantly by 20 times)) a fort-shaped arch bridge. The method is (T (coffee olive oil) + X (mineral water can Ode).

Remember what our problem was? Let's review again, our question is,

i. YOUR FAMILY WAS DECEIVED INTO BUYING A HOUSE AND LAND IN ATHENS, GREECE. THE RENT IS 0. SHOULD YOU SELL IT AT A LOW PRICE? OR INCREASE YOUR INCOME? WHAT SHOULD YOU DO? – PLEASE USE HELP MATRIX TO SKETCH THE SOLUTION IN 1 MINUTE.

We need to help this house in Athens, Greece, which cannot be rented, get monthly revenue without increasing marketing and maintenance costs. Through a set of matrix kids cards, it is exclusive to this house and cannot be rented out. The Greek B&Bs that make money are sold not only to people visiting Athens but also to all friends worldwide who have a deep affection for Athens and Greece and are sold worldwide.

Does this help goal cool?

Let's make it happen together, shall we? 54321, let's do it together.

First of all, we must make sure that the purpose of our set of cards is to help people all over the world understand Greece and beautifully connect with the world; that is, we convinced my town (due to water shortages in the city, there had been After a bad tourist incident, there were a lot of negative comments on the Internet), just like 30% off pizza every Wednesday, it is accessible to the world every Wednesday. At the same time, legally, we ensured that this was not a vertical monopoly and malicious competition but followed the local Anti-Unfair Competition Law, and a free service agreement was reached. At the same time, it helps our B&B to solve the problem of simple bathrooms and inconvenient repairs. It can be obtained for free by paying).

The goal is to make the world love seaweed as much as they love seaweed (indeed, not the globe loves seaweed; this needs to be revised) and love our unknown Greek town. At the same time, the number of people who come to our B&B to make reservations has increased compared to the past. More than 20 times, from one road to that, to better welcome tourists from north to south, we specially built a hamburger-shaped arch bridge (maybe a code word) to welcome tourists from north to south. The primary method is (a method that uses olive oil pressing technology to successfully push coffee-flavored olive oil. Our unique local specialty, and a delicious mineral water-flavored croissant. (Wow! This is wild enough.)

How do I make this set of cards? How soon will it be released? Remember the steps of our sale? The first thing to do is find your Tippecanoe. Tippecanoe was just a county then, and finding a sense of belonging in your small town was the first step to success. First, you must contact all the other B&B hosts in your town and establish excellent relationships, so much so that everyone is willing to sign an agreement to provide free access to tourists worldwide every Wednesday.

To complete it better, you must complete an excellent PPT and content to tell other B&B hosts this sentence, "You must fall in love with the B&B in our town just like the whole world falls in love with seaweed." This sentence means that although seaweed is relatively inconspicuous, it is also a seafood product! I still remember the author of the book *Little Beans Outside the Window*: the lunch box should have the taste of the mountains and the sea.

Although our small town is not as good as the Temple of Athens, and although it is not as good as the tourist attractions that everyone can search for on a run d, we have everything, including the sea, mountains, lakes, the most beautiful scenery, and the most hospitable people., simple small-town residents. The core goal of this set of cards is to welcome visitors from south to north by building a hamburger-shaped arch bridge (which can be metaphorical) and at least visually feel our beauty. The primary method is to use olive oil with a coffee flavor and a healthy food that tastes like mineral water without any sugar, salt, or added, but it just looks like a croissant.

How do I make this set of cards?

First, we determined the main body and created a croissant promotion that tasted like mineral water and olive oil like coffee—such a sample. We want to focus on the core advantages of these two products in the card. First, the core advantage of coffee-flavored olive oil is that it is healthy, low-fat, and very convenient in lowering cholesterol and reducing oil secretion. The most important thing is that it is purely natural. Besides, the croissant that tastes like mineral water is a visual experiment that satisfies people's specific needs for carbohydrates, high fat, and oil and truly helps people achieve health. We first display these two products to the world in the form of electronic cards, and then we look for suitable suppliers. First, we seek appropriate, healthy raw materials in our town to innovate products and, at the same time, connect all the people around the world. Olive Oil Brand Company partners with all the world's famous croissant brands and has achieved strategic alliances with many similar brands. It can help other brands create new product categories, provide samples, and promote and explain health knowledge. All visitors to the town and all "e-tourists" who learn about the city online learn about industry insider knowledge and information about excellent industry alliances, breaking down industry barriers. Fulfill the call for more resources.

This is the core meaning of this set of cards. At the same time, note that we can use coffee, olive oil, and mineral water croissants as the core positioning points to create a burger bridge composed of these two materials. At the same time, we can cooperate with burger brands like Burger King worldwide. In this way, it is better to connect us with visitors worldwide.

The production of this set of cards will attract tourists and olive oil brand agents from all over the world, croissant brand agents from all over the world, and burger (like Burger King) brand agents to carry out comprehensive Cooperation.

Simultaneously, please note that we have created a brand in Burger King, equivalent to a country within a country. We have created a new brand in the country, a fresh, healthy, very healthy, and bridging product. Few people will feel that eating a small hamburger can help such a cute town in Greece. It has an incredible effect. That's what this set of cards is about.

As for the main body of help, we mentioned, this small town in Greece has achieved it. In addition, bathroom repairs must be done by accident because our B&Bs and hotels must have excellent bathrooms. The bathroom is one of a company's most ruthless, seemingly inconspicuous but core parts.

This method is inappropriate if the guest has an emergency at night and needs to go to a public restroom elsewhere. Therefore, the best way to use the bathroom is to cooperate with a brand agent, such as an olive oil production company. , pressing companies, make suggestions for cooperation, such as sponsoring our bathrooms, we can put your olive oil brand directly in the reception area of our B&B, distribute your olive oil samples to our customers, and promote your brand, as long as you Offer to help us sponsor our bathroom renovations.

Hahahahaha! Do you like this unique journey? We hope you enjoy it. We have tested five HELP MATRIX templates together. Do you think it is cool now? The natural beauty of coolness lies in the application.

Matrix Kids Cards are with you, by your side, as always.
